Business Methods Case: 705/26, 27

Log Number 84270

Write in 705 subclass(es) to search required files for 705 cases or cases cross referenced in 705.

Requester's Full Name: Forest Thompson Examiner #: 76652 Date: 1/14/2003

Art Unit: 3625 Phone Number 306-5449 Serial Number: 09/557,040

Bldg & Room #: CPK5/7X07 Results Format Preferred: PAPER DISK E-MAIL

If more than one search is submitted, please prioritize searches in order of need.

Provide the PALM Bib page or the following:

Title of Invention: Internet Based Computer System Exchange

Inventors (provide full names): James Ellis; Wolfgang Nickl

Earliest Priority Filing Date: 4/21/00

01-15-2003 10:08:17

Requested attachments:

- If possible, provide the cover sheet, the IDS, examples, or relevant citations, authors, etc, if known.
- Please attach copies of the parts of this case that help explain or are most pertinent to this search. Examples are: **abstract, background, summary, claim(s) [not all of the claims].**

**The claimed or apparent novelty of the invention is:**

In an exchange server in a network, a method for executing buy order wherein the network is electrically connectable to a plurality of owner-processors, the owner-processors having proprietors, at least one proprietor having an ownership interest in the computer component exchange, wherein each of the plurality of owner-processors are capable of being associated with one or more shares representing the respective proprietor's ownership in the exchange server complex, at least a first owner-processor adaptable to transmit electronic buy orders through the network for purchasing computer components, at least a second owner-processor adaptable to receive buy orders from the network, the method comprising the steps of:

- receiving buy orders from the first owner-processor;
- matching buy orders with a second owner-processor;
- calculating a fee for matching;
- charging the calculated fee to at least the first owner-processor or second owner-processor, or to both;
- calculating a net profit resulting from charging a fee
- apportioning the net profit based on the number of shares associated with each owner-processor.

**This search should focus on:**

(Also include keywords or synonyms)

**KEYWORDS:**

associating one or more shares representing the respective proprietor's ownership; network  
charge fees pay dividends or capital gains payment transfer for products

Special Instructions or Other Comments

**Some Claims for 09/557,040:**

**18. In an exchange server complex for computer component exchange in a network,**

**a method for** executing buy orders for purchasing computer components, wherein the network is electrically connectable to a plurality of owner-processors, the owner-processors having proprietors, at least one proprietor having an ownership interest in the computer component exchange, wherein each of the plurality of owner-processors are capable of being associated with one or more shares representing the respective proprietor's ownership in the exchange server complex, at least a first owner-processor adaptable to transmit electronic buy orders through the network for purchasing computer components, at least a second owner-processor adaptable to receive buy orders from the network, the method comprising the steps of

- receiving one or more buy orders for computer components from the first ownerprocessor;
- matching the one or more buy orders with a second owner-processor;
- calculating a fee for matching the buy order with the second owner-processor;
- charging the calculated fee to at least the first or second owner-processor, or to both the first and second owner-processors;
- calculating a net profit resulting from charging the calculated fee; and
- apportioning the net profit based on the number of shares associated with each owner-processor.

**19.** The method of claim 18, comprising providing incentives for the proprietors of each of the owner-processors to place or receive buy orders with the exchange server complex by associating one or more shares with the owner-processors that place or receive a threshold number of buy orders.

**27.** The method of claim 18, comprising referring either the first, second or both the first and second owner-processors to a value added service.

**28.** The method of claim 27, comprising charging a referral fee to the value added service 2 after the step of referring.

**29.** The method of claim 28, comprising apportioning the fee received from the value added service as part of the net profit among the owner-processors based on the number of shares associated with each owner-processor.

AB- <PN> WO 200124089 A11

AB- <NV> NOVELTY - A host (32) sorts discrete items from multiple distributors (17), according to class designation and assigns unique identification tags to members of similar class. A store owner (36) communicates with host and requests for allotment of unique tag. In response to request from store owner, host creates a store (40) to provide a consumer with access to item relative to unique tag, through distributors.1

AB- <BASIC> DETAILED DESCRIPTION - The store created by host in response to request from store owner, is customized by top and bottom border design, dominant color, font style, store name, slogan, narrative and URL.

USE - For electronic commerce using world wide web.

ADVANTAGE - Enables anyone to access computer and Internet, to create an on-line store quickly and at less cost and provide it to store owner, thereby increasing product sales. Enables store owner to manufacture, customized or maintain an on-line store at less cost. The purchase price is divided between the distributor, store owner and host, hence profit of consumer is increased. A single destination site supports multiple products, hence multiple needs of consumer can be satisfied without need for consumer to visit multiple sites.

DESCRIPTION OF DRAWING(S) - The figure shows the block diagram of customized E-commerce system.

AB- PROBLEM TO BE SOLVED: To solve a problem that it is difficult to collect stable customers by a conventional method because large sales promotion costs are used for selling a traveling commodity to the general public and customers are missed due to slight differences in quality/prices/service. SOLUTION: A selling method for selling traveling commodities only to customers to be stockholders through the Internet and paying a fixed rebate to the customers in accordance with each commodity selling price is provided in order to solve the problem. Each stockholder has extremely high loyalty to the enterprise and can obtain his (or her) own economical effect by obtaining the fixed rebate to a purchase price. When the enterprise grows and yields profits, the stockholders can obtain dividends also and the business can be attained by recruiting many stockholders and selling traveling commodities by utilizing the Internet without using large selling costs. AB- <NV> NOVELTY - A method and a system for providing a payment guarantee in a business-to-business(B2B) through a network are provided to reduce a direct cost and an opportunity cost according to a cost settlement through a letter of credit(L/C) between banks and between a bank and an enterprise by realizing a conditional payment guarantee other than an existing commerce method using the L/C.|

AB- <BASIC> DETAILED DESCRIPTION - A payment guarantee subsidiary organ(100) is set on a network. A payment guarantee organ(500) such as a bank sets enterprise information about at least one business enterprise of a purchasing enterprise(200) and a sale enterprise(300)

AB- <NV> NOVELTY - A method and a system for providing a payment guarantee in a business-to-business(B2B) through a network are provided to reduce a direct cost and an opportunity cost according to a cost settlement through a letter of credit(L/C) between banks and between a bank and an enterprise by realizing a conditional payment guarantee other than an existing commerce method using the L/C.|

AB- <BASIC> DETAILED DESCRIPTION - A payment guarantee subsidiary organ(100) is set on a network. A payment guarantee organ(500) such as a bank sets enterprise information about at least one business enterprise of a purchasing enterprise(200) and a sale enterprise(300)

Search Report from Ginger D. Roberts

and a credit line of the business enterprise, and registers them through the network. The payment guarantee organ(500) notifies main contract information based on a business contract concluded between the purchasing enterprise(200) and the sale enterprise(300) to the payment guarantee subsidiary organ(100) through the **network** . At **least** one side among the purchasing enterprise(200), the sale enterprise(300), and a transport company(400) notifies information about a commodity **transfer** and a **transfer** process to the **payment** guarantee subsidiary organ(100) through the network. The payment guarantee subsidiary organ(100) retrieves the main contract contents and the information about the commodity transferring and the transferring process.

**Hosts with the mosts -- Web hosters are going far beyond simple collocation to offer an all-you-can eat buffet of managed services**

Caisse, Kimberly B

Network World , November 20, 2000 , v17 n47 p58-60, 3 Page(s)

ISSN: 0887-7661

Company Name: AT&T; Digex; Exodus Communications; Genuity; IBM Global Services

Presents a primer on **Web hosting** companies. Names the Web hosters: AT&T Corp., Digex, Exodus Communications, Genuity, GlobalCenter, IBM Global Services, Quest, UUNET, and Verio. Describes them in terms of number of data centers in the United States, space options, hosting options, **ownership** of equipment, managed service offerings, **costs** , and service-level agreement (SLA) offerings. Cites the predominant trend among Web hosters of expanding from simple collocation to **managed services** . Enumerates the types of **managed services** that companies can expect to choose from: Web site design, capacity planning, testing, application monitoring, security monitoring, storage management, content distribution, load balancing, bandwidth utilization, reboot capability, clustering, multilayered redundancy, and site mirroring. Includes a sidebar. (MEM)

Joel Ronning, CEO of Digital River, describes his firm as a 'commerce service provider.' Essentially, the firm delivers complete Web solutions to clients. Digital River provides strategy, creative design, Web site development, hosting, content management, back-end application integration, transaction processing, fraud protection, marketing, customer service, and delivery. Such clients as Major League Baseball, Nabisco, Siemens, and Staples have handed over their Web operations to Digital River, motivated by savings on infrastructure costs. Additionally, Digital River offers more refined services to clients. For example, its fraud prevention team reports a fraud rate of 1.5 percent of **sales** worldwide. Standard e-commerce fraud rates come in between 15 and 25 percent of **sales** . Digital River works on a **profit - sharing** model, and, therefore, has a strong motivation in operating Web sites at peak efficiency. Digital River's commerce service provider concept is facing competition from a number of companies, including start-ups Escalate and Asera. Additionally, Amazon and Applied Terravision Systems are entering the market. Applied Terravision Systems

Search Report from Ginger D. Roberts

hosts and manages a Web-based accounting application. Additionally, it supplies actual accountants for data entry and processing, providing, in essence, a Web outsourcer.

REVIEW TYPE: Company

freemERCHANT.com, a provider of free e-commerce hosting and related services, including online transaction processing (OLTP), to small companies, does not charge for server space or storefront creation software, and also offers centralized access to related e-commerce services. The latter include merchant accounts for credit card orders and OLTP, at a greatly reduced cost. All freemERCHANT.com asks of recipients is ad space on member merchants' sites. Serge Wilson, founder and CEO of freemERCHANT.com, says the only successful way to get small businesses online is to offer free services. freemERCHANT.com aims to aggregate demand for e-commerce-related services so that the company can, in the future, provide other non-Web-centered services, including discounted travel. freemERCHANT.com's systems run Novell NetWare on core servers, and use large amounts of company-developed code. Other providers attempting to meet the e-commerce needs of small businesses are Yahoo!, with Yahoo! Store, as well as iCat, IBM, and Forman Interactive. However, freemERCHANT.com's competition charge fees of varying amounts for their services, based on the size of the product catalog. Levels of assistance provided also vary. freemERCHANT.com plans to set itself apart by making services free and by developing a comprehensive site of aggregated services at group rates. freemERCHANT.com has agreements with First American Card Services and Respond.com, and is in discussion with several other companies.

Other providers attempting to meet the e-commerce needs of small businesses are Yahoo!, with Yahoo! Store, as well as iCat, IBM, and Forman Interactive. However, freemERCHANT.com's competition charge fees of varying amounts for their services, based on the size of the product catalog. Levels of assistance provided also vary. freemERCHANT.com plans to set itself apart by making services free and by developing a comprehensive site of aggregated services at group rates. freemERCHANT.com has agreements with First American Card Services and Respond.com, and is in discussion with several other companies.

Amalgamated to make \$32m issue

AUSTRALIA: AUD 32 MN ISSUE BY AMALGAMATED

Australia Financial Review (AFR) 20 Oct 1993 P.24

Language: ENGLISH

To raise capital, Australian diverse theatre, tourism and leisure group, Amalgamated Holdings Ltd will do so using the convertible preference share route. It was disclosed by them that the above consisted of a AUD 32 mn converting preference share issue to pay a fully franked dividend of 5% until conversion in May 1997. Proceeds of the issue are to help strengthen the group's capital base and restructuring of hotel leases while some of it will go towards debt reduction and working capital. The preference shares will be issued at AUD 7.50 each on the basis of 1-for-5 ordinary shares . \*

Yahoo!'s Yahoo! Store, Intershop's InterShop Online 3, Prodigy Services's Starter Class, ValuWeb's Miva-Merchant, Amazon.com's zShops, and Boomerang Software's WebShop Designer 2000 are Web e-commerce implementation products compared for **Web hosting** ; using your own domain; shopping cart services; support for credit card **sales** ; store promotions; and database links. The most straightforward and uncomplicated way to begin e-tailing is to set up a site through an e-commerce storefront provider. They offer turnkey functions that provide virtual shopping mall features. For instance, Amazon.com's zShops program charges a **fee** for each product listed and a completion **fee** for each object sold. Such **fees** can take a large chunk of **profits** , but users get many advantages in return, including automatic addition of items to the site's listings and a searchable database. No Web address has to be maintained since zShops creates pages for products when customers request them. Yahoo! Store has similar services, but its e-commerce stores look and function more like individual Web sites than zShops'. MindSpring Enterprises and prodigybusiness.com are **Internet** service providers (ISPs) and **Web hosting** companies with lower **fees** , but users must do more work to set up shop. Their InterShop 3 and Starter Class products can get business started.

GRADE: Product Analysis, No Rating

Joel Ronning, CEO of Digital River, describes his firm as a 'commerce service provider.' Essentially, the firm delivers complete Web solutions to clients. Digital River provides strategy, creative design, Web site development, hosting, content management, back-end application integration, transaction processing, fraud protection, marketing, customer service, and delivery. Such clients as Major League Baseball, Nabisco, Siemens, and Staples have handed over their Web operations to Digital River, motivated by savings on infrastructure costs. Additionally, Digital River offers more refined services to clients. For example, its fraud prevention team reports a fraud rate of 1.5 percent of sales worldwide. Standard e-commerce fraud rates come in between 15 and 25 percent of sales. Digital River works on a **profit - sharing** model, and, therefore, has a strong motivation in operating Web sites at peak efficiency. Digital River's commerce service provider concept is facing competition from a number of companies, including start-ups Escalate and Asera. Additionally, Amazon and Applied Terravision Systems are entering the market. Applied Terravision Systems hosts and manages a Web-based accounting application. Additionally, it supplies actual accountants for data entry and processing, providing, in essence, a Web outsourcer.

01132951 ORDER NO: AAD90-28079

**POTENTIAL IMPACTS OF VARIOUS CAPITAL GAINS TAX STRUCTURES ON FOREST INVESTMENTS (TAX, INVESTMENTS)**

Author: RAPERA, CORAZON L.

Degree: PH.D.

Year: 1990

Corporate Source/Institution: VIRGINIA POLYTECHNIC INSTITUTE AND STATE UNIVERSITY (0247)

Chairman: W. DAVID KLEMPERER

Source: VOLUME 51/07-A OF DISSERTATION ABSTRACTS INTERNATIONAL.

PAGE 2466. 145 PAGES

The objective of the study was to determine how various **capital gains** tax structures affect decisions to invest in new forest investments. These effects were measured by changes in the after-tax present values of bare land under each tax structure. The three **capital gains** tax structures modeled were: the current federal income tax law without basis indexing, the current federal income tax law with basis indexing, and the accrued income tax with indexing.

Two equity criteria were considered in the study. The first criterion requires the tax to be neutral with respect to allocation of land to different uses. The second criterion requires **capital gains** recipients to pay, at investment maturity and with other things equal, taxes equal to the sum of annual taxes on increases in asset value (accrued income) accumulated with interest.

The study showed that, without inflation, the realized income tax (the current federal income tax) is neutral with respect to allocation of land uses with different rotations because the tax reduces the bid prices for land uses with different rotations by equal percentages, other things equal. However, with inflation, the results suggest that basis indexing is needed in order to maintain the tax's neutrality with respect to allocation of land to uses with different rotations.

Under the second criterion, a forestry example was compared with a bank account, both with equal value growth rates. It showed that taxes paid on realized **capital gains** at investment maturity are lower than the sum of annual taxes on accrued income accumulated with interest, given the same tax rate. Thus, the current federal income tax, which taxes **capital gains** upon realization, does not meet the second equity criterion. Based on this criterion, the tax favors assets that yield **capital gains** over assets with annual incomes.

These results indicate that none of the taxes modeled can meet the two equity criteria simultaneously. Even so, among forest investments, the current federal income tax with basis indexing is the most desirable because it is **least** likely to distort allocation of land to forestry. (Abstract shortened with permission of author.)

Hampson back on course  
UK: Exceptional charge moves Hampson into red  
Birmingham Post (ESK) 12 Jun 2002  
Language: ENGLISH

Moves to consolidate Hampson's network of small units left an exceptional charge of GBt 8.97mn on its books for the year to 31 March 2002, taking the aerospace and car components company into the red by GBt 4.93mn. Revenue, however, fell just 4% to GBt 87mn with the car parts division contributing GBt 19mn. The company forecast that recovery in the aerospace market would not take place until at least 2004, but it nevertheless was confident about increasing its own share of the sector during the current year. No final dividend will be paid. \*

Morton to quit rail job  
UK: MORTON TO LEAVE SRA; WINSOR TO RECLAIM DIVIDEND?  
Observer (ZCR) 24 Jun 2001 Business p.1  
Language: ENGLISH

Search Report from Ginger D. Roberts

Sir Alastair Morton, the chairman of the Strategic Rail Authority (SRA) is set to leave his post. His departure could come as early as the next few weeks. Sir Alastair's resignation had been widely expected after ministers had expressed disappointment at delays in delivering his ten-year strategy for the industry and shaking up the passenger franchises. Stephen Byers, the Transport Secretary, will now begin the process of finding a successor to Sir Alastair. One early front-runner has emerged in the form of Richard Bowker, co-chairman of Sir Richard Branson's Virgin Group. In a separate development it has emerged that Tom Winsor, the rail regulator, is considering penalising Railtrack, <the beleaguered track operator>, over the GBt 137mn **dividend** the privatised company **paid** to its shareholders last month. Mr Winsor has the authority to recover the payout when he conducts the next review of Railtrack's finances. Railtrack claims **it** needs at **least** GBt 2.5bn from taxpayers to fill a GBt 3.5bn financial black hole, and Mr Winsor could deduct GBt 137mn from any payment if he considers the **payment** of the **dividend** to have been unjustifiable. One senior SRA source said there was anger that Railtrack had failed to find money for rail projects and yet had still been able to make the payment. The source also said that if Mr Winsor did decide to withhold funds he would probably receive the backing of the SRA and government ministers.

Profit fuels Cafe de Coral growth drive  
HONG KONG: CAFE DE CORAL SEES PROFIT GROWTH  
South China Morning Post (XKT) 08 Dec 1999 p.b2  
Language: ENGLISH

Cafe de Coral reported a 20.56% rise in net profit to HK\$ 95.06mn in the six months to 30 September. The turnover rose from HK\$ 1.15bn to HK\$ 1.16bn. It **paid** an **dividend** of 4 cents. The profit growth was due to improvement from its Spaghetti House and institutional catering service. It also attributed to effective cost control. It plans to expand fast food operation except the Ah Yee Leng Tong which lost millions of dollars. It will invest HK\$ 40mn in 15 new outlets, HK\$ 30mn in 30 outlet renovations and HK\$ 100mn in buying some outlet premises. It plans to open a 16,000 sq new outlet in Central. It expects to seek **rental** reduction by 20% in the next few months, down from last year's 30% cut because of property market improvement.

LEADING COMPANIES PAY LESS THAN 10% TAX  
AUSTRALIA: LEADING COMPANIES PAID LITTLE TAX  
The Australian Financial Review (AFR) 14 Oct 1996 P.1  
Language: ENGLISH

A survey conducted jointly by The Australian Stock Exchange and The Australian Financial Review found that some of the largest firms in Australia paid almost no tax in the 1995-96 financial year. In general, the corporate tax paid on normal earnings remained unchanged at 1994-95's 26.8%. This is despite the surge in tax rate from 33% to 36% in 1995-96. Some of the lowest taxpayers being Lend Lease Corp(the 14th largest firm in

Australia)- 3.3 cents in every dollar of normal earnings; Seven Network- 2.75 cents; Foster's Brewing- 7 cents; News Corp- 5.5 cents and Stockland- 8.7 cents. On the other hand, BHP's tax rate dipped a mere 1% to 35%. The savings is largely responsible for the bulk of the AU\$ 72 mn lift in aggregate dividends paid .

INHERITANCE TAX PAYMENTS COULD STILL CAUSE PROBLEMS  
UK - INHERITANCE TAX PAYMENTS COULD STILL CAUSE PROBLEMS  
Financial Times (C) 1991 (FT) 13 April 1991 pV

United Kingdom: changes to the **Capital Gains** Tax retirement relief provisions were among the proposals for businessmen in Norman Lamont's budget. However, proprietors wishing to take advantage of these measures should beware of stepping into the Inheritance Tax fire. Retirement relief applies when a business owner disposes by gift or sale of all or part of his business, provided he has owned it for at **least** ten years. Under the present rules the first GBP125,000 of gain on any disposal is exempt from CGT and the next GBP375,000 benefits from 50 per cent relief. The Chancellor proposes to increase the limits for relief by substantially more than inflation, making GBP150,000 wholly exempt. Perhaps the most significant change however is that Lamont intends to reduce the age of eligibility for this relief from 60 to 55. However, disposal of a business can mean the loss of valuable Inheritance Tax reliefs and it is therefore essential that this is properly planned for. The option for early retirement also enhances the benefits of business assurance, where, following the death of a business proprietor, his co-proprietors use the proceeds of a life assurance policy to buy his interest from the beneficiaries of his estate. **Wal-Mart's Goals**

Shewmaker, Jack

Discount Merchandiser v28n1 PP: 48-50 Jan 1988

ISSN: 0012-3579 JRNL CODE: DMD

...ABSTRACT: Wal-Mart's Jack Shewmaker said that, in 1987, the chain added \$4 billion in **sales** to 1986's base. The chain maintains a strong real estate construction and expansion program and negotiates to eliminate percentage-of- **sales** clauses from its **rental** agreements. It also cuts costs in advertising. Its 36-page circular lists no sale prices, only everyday...

... While the chain cut prices this year, it saw profits continuing to grow faster than **sales** growth. Both total costs and advertising and promotion costs continue to decrease, with the latter running at only 0.4% of **sales** . To deal with its growing size, Wal-Mart will have its own satellite

network operating...

... transmitting data at lower costs than over regular telephone lines. Employee performance is enhanced by **profit - sharing** plans, as well as weekly **sales** reports allowing department managers to track their performance versus other departments. The firm opens its...

**COST CONTROL: Outsourcing Central Services Yields Savings**

American Banker - October 25, 1990; Pg. 10; Vol. 155, No. 209

SECTION HEADING: Management

ARTICLE TYPE: News

WORD COUNT: 344

**BYLINE:**

By JEFFREY MARSHALL

**TEXT:**

The banking unit of Bankers Trust New York Corp. has found that outsourcing various centrally **managed services pays dividends** of up to \$4

million per year. And Home Federal Savings and Loan Association, San Diego, has also reported savings from curtailing demand for in-house service centers.

Corporate service centers handle such duties as purchasing, mail delivery, real estate or premises management, accounting, payroll, benefits, cafeteria management, insurance, security, and legal chores.

Bankers Trust has "vended" 15 services in the past five years, including internal mail, the records warehouse, messengers, purchasing, and printing services.

Savings have totaled more than \$10 million, said Charles H. Nobs, senior vice president for corporate operating services.  
Learning from Negotiations

Home Federal found that negotiations between service centers and business lines spurred cost-cutting. "As line officers discovered how their actions drove up indirect costs, they began using support-center services differently," chief financial officer William Nichol said at a California conference this year.

The result was that Home Fed's staffing and costs for information services dropped in 1989.

**The Technique Has Limits**

Some consultants and bankers agree, however, that internal trimming and shaving, while helpful, cannot turn an endangered institution into a winner.

Expense reduction is "often translated within a cost-minimization framework because the ability to understand the impact of costs and expenditures on revenues is so imperfect," said David Riffelmacher, sector executive for financial services at PA Consulting Group, Hightstown, N.J.

"The first reaction is to examine costs closely and focus on the cost side," he said, "which will improve your position for a few quarters but is not going to help you in the long run."

"There's a tendency in the industry to be inward-looking rather than market-looking, and this (cost focus) exacerbates that," Mr. Riffelmacher said.

If a business needs to be cut 40%, Mr. Riffelmacher said, that demands re-engineering, not just cost-cutting. That's where managers need to know not just their costs but also the relationship of costs and revenues and how to work that equation to best advantage.

 A plastic container (1) is moulded in one part in on operation ot  
 include carrying handles (8', 8''). The container mould has a  
 peripheral impression around the upper edge of the cavity and connected  
 to it at at **least** two points midway along the larger sides of the  
 container (9). After moulding these impressions leave two hoops (8',  
 8'') connected to the container at the mid points (9) but separated  
 elsewhere from the upper container edge (7). The hoops are bent to  
 bring their control parts together to form the handle.  
 USE/ADVANTAGE - A carrying basket partic. for horticultural  
 purposes, e.g. plant **sales** moulded in a single operation in a simple  
 mould, at low **cost** and able to be stacked are inside another prior to  
 useR

AB- <BASIC> DE 3540735 A

The shelving unit, for **sales** goods, has two base panels (2,3) detachably joined by a head piece (4), and possessing surfaces (5,6) on which the goods stand. The inner, facing longitudinal edges of the base panels (2,3) have a space between them.

The head piece (4) has essentially the same width (B) as the article being displayed for sale on the panels (2,3). The combined widths (B2,B3) of the panels (2,3) is less than the width (B) of the top piece (4). The base panels (2,3) have guide or stop pieces (8,9,12,13) for holding the head piece (4) which has corresponding counter parts (10,11,14,15).

USE/ADVANTAGE - The shelving unit saves material by having base panels for the goods with a gap between them which can be adjusted to the goods on them.

1/31

AB- <DE> DE 3540735 C

The display stand for merchandise, particularly in the form of shelving, has a goods-display surface (5,6) divided into two by a gap, with at least one side (18). The width of the stand is determined by an endpiece (4) joining the two base plates (2,3) forming the display surface and fixed to one end of them.

The underneath side of the two base plates at one end has guide pieces (8,9) onto which is pushed the slots (10,11) in the end piece (4). Raised stop pieces (12,13) fitting into cavities (14,15) in the end piece (4) are positioned near the end piece on the base plates.

USE/ADVANTAGE - The merchandise display surface can be adapted to various widths of goods, by an end piece fitting onto two base plates. (7pp)e1

AB- <EP> EP 224107 B

Device for the presentation of articles for sale, in particular shelf unit insert, which displays two base plates (2, 3), which form a product support surface (5, 6) divided by a gap longitudinally dividing the device (1) throughout and of which at least one is provided with a side web (18), which is firmly shaped on to it, and at **least** one element, which holds this fixed at a spacing, determines the width of the device (1) and which corresponds substantially with the width of the article of sale to be presented, wherein the added individual widths (B2, B3) of the regions of the product support surface (5, 6), which are divided by the gap, are smaller than the width (B1) of the connecting element, characterised thereby, that the element is a head part (4), which is pushable onto the base plate (2, 3) at the end face and clampingly and detachably connects these each with the other. (9pp)

AB- <US> US 4724968 A

The shelf insert for displaying retail articles comprises two baseplates releasably interconnected by a head piece. It has a displaceable support located between the baseplates at the rear portion of the device. The baseplates have supporting surfaces for the articles. The baseplates are spaced and kept apart from one another by the head piece and the support.

The head piece determines the width of the device. The width of the head piece corresponds to the width of the articles to be displayed on the baseplates. The baseplates have a guide and at least one retainer formed underneath the supporting surfaces for interconnection with the

Search Report from Ginger D. Roberts

head piece.

ADVANTAGE - Low **cost** with materials savings. (7pp)gl

AB- PROBLEM TO BE SOLVED: To provide a service whose additional value is high while maintaining the privacy protection of a user at the time of realizing task cooperation among the different kinds of tasks by using a communication **network**. SOLUTION: A **rental** business store 10 is connected through a communication network to an automobile dealer store 20. Not only the user data of the dealer store 20 but also the membership data of the rental business store 10 are stored in an integral server 20a. When a user rents a CD or the like in the rental business store 10, data related with point data among the **sales** data are supplied to the integral server 20a, and stored. Also, when the user purchases a vehicle or the like in the dealer store 20, point data corresponding to the purchase sum are supplied to the integral server 20a, and stored. The point data are supplied to each terminal 10d and 20b, and issued as coupon tickets so that the user can enjoy the offer of the discounts of a rental **fee** or a car washing service or the like. AB- PROBLEM TO BE SOLVED: To set a proper **fee** for both a service provider and a user and also to perform the fine management of **sales** and profit in response to each purpose.

SOLUTION: This device includes a statistic means 208, which collects statistics of the using frequency of various service providing templates and a **fee** decision means 204, which decides the **fees** of the templates based on the information on the template using

Search Report from Ginger D. Roberts

frequency acquired by the means 208. Then, the using frequency of templates are statistically managed and reflected in the decision of the template **rental fees**. Thus, it 's possible to set the **fees** based on the concrete numerals and to perform the dynamic management of sale and profit with no management dependent on the human perception. As a result, the labor, **cost** and time needed for setting the prices can be significantly reduced and also every optimum price can be automatically set.

AB- PROBLEM TO BE SOLVED: To solve a problem that it is difficult to collect stable customers by a conventional method because large sales promotion costs are used for selling a traveling commodity to the general public and customers are missed due to slight differences in quality/prices/service. SOLUTION: A selling method for selling traveling commodities only to customers to be stockholders through the Internet and paying a fixed rebate to the customers in accordance with each commodity selling price is provided in order to solve the problem. Each stockholder has extremely high loyalty to the enterprise and can obtain his (or her) own economical effect by obtaining the fixed rebate to a purchase price. When the enterprise grows and yields profits, the stockholders can obtain dividends also and the business can be attained by recruiting many stockholders and selling traveling commodities by utilizing the Internet without using large selling costs. AB- PURPOSE: To make a profit report by previously storing cost information required to calculate the cost from the sales amount, and calculating the profit on the basis of the pieces of information on the sales amount and the cost.

CONSTITUTION: A memory 3 stores total amounts of sales by days, the number of sales by day, the total amount of sales up to the current point, the loss of sales amount, such as the discount

Search Report from Ginger D. Roberts

amount, a **cost** rate, etc., in its storage areas corresponding to **divisions** . To make a **profit** report, a mode changeover switch on a keyboard 1 is set to a check or reckoning mode and a numeral 2 is inputted with register keys. Consequently, a CPU2 read the integrated amount of scale and the loss amount of **sales** out of the memory 3 and adds them mutually, and it reads information on the **cost** rate and multiplies the sum by it to find the **cost** . Then, the **cost** is subtracted from the integrated amount of sale to find profit information, thus making the profit report.

?
